Summary

Computer Science undergraduate with hands-on experience building and deploying production applications across fintech, AI, and full-stack environments. Proficiency in backend development, API integration, database design, distributed systems, and end-to-end application ownership. Led development teams and collaborated directly with stakeholders to deliver production systems. Solved **850+ problems on LeetCode**, with strong foundations in data structures, algorithms, and system design.

Education

Bachelor of Technology, Computer Science and Engineering

2023 — 2027

SRM Institute of Science and Technology **CGPA: 9.5/10**

Kattankulathur, Chennai, India

Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks.

Technical Skills

Languages: Java, TypeScript, JavaScript, SQL

Frontend: React.js, Next.js, HTML, CSS

Backend: Node.js, Express.js, REST APIs, WebSockets

Database: PostgreSQL

DevOps & Deployment: Vercel, Render, Supabase, Git, GitHub, DNS & Domain Configuration

Experience

Full Stack Developer, Xtin Capital (xtincapital.com) · Remote

Oct 2025 — Present

- Architected and developed a production fintech platform (React, Node.js, Express, PostgreSQL), integrating **10+ third-party APIs** including payment gateways and financial data services, improving response efficiency by **25%**.
- Led a team of **5 developers** via Agile sprints and code reviews, and automated form handling, notifications, and data-sync workflows with n8n to reduce manual processing by **40%**.
- Managed **20+ production releases** across Vercel and Render, configuring environment variables, domains/DNS, API integrations, and deployment workflows to ensure reliable end-to-end delivery.

AI Intern, Berry Stenley (berrystenley.com) · New Delhi (Onsite)

Jun 2026 — Aug 2026

- Owned end-to-end deployment of an internal AI/RAG platform on Render and Supabase and redesigned an AI education admin platform with RBAC, supporting **10,000+ users** and **20+ courses**.
- Built payment-gated resource delivery with Razorpay/PayPal verification and superadmin approval workflows, processing **1,000+ transactions** and reducing manual access processing from **2 hours to 20 minutes**.
- Independently managed frontend development, testing, deployment, and production troubleshooting across **2 platforms**, resolving **nearly all frontend bugs** and maintaining reliable production releases.

Projects

GigShield - AI Parametric Income Protector *React, Three.js, Express, Supabase*

[Live](#) · [Code](#)

- Designed an AI-powered parametric income-insurance platform across **5 disruption scenarios**, automating policy eligibility, fraud validation, and zero-touch payout workflows for gig workers.
- Engineered location-based trigger logic using **3 application layers**—React frontend, Express APIs, and Supabase/PostgreSQL—while building an interactive 3D experience with Three.js and React Three Fiber.
- Integrated 4 real-time signal sources**—weather, AQI, traffic, and platform status—across **5 disruption types**, automating trigger detection, claim initiation, fraud checks, and payout settlement through a **4-stage claim lifecycle**.

Distributed Job Scheduler *Node.js, TypeScript, Express, PostgreSQL, WebSockets*

[Live](#) · [Code](#)

- Engineered a distributed background-job platform spanning 3 projects and **8 queues**, implementing atomic PostgreSQL job claiming with FOR UPDATE SKIP LOCKED, priority scheduling, **2–15 job concurrency limits**, and a dead-letter queue for failed jobs.
- Implemented **3 retry strategies** (fixed, linear, exponential), PostgreSQL advisory-lock leader election with automatic failover, and worker heartbeat-based crash recovery with **5-second heartbeat intervals** and **30-second worker timeouts**.
- Modeled job dependencies as a DAG and enforced prerequisite completion at the database layer, with automated tests covering **4 critical reliability paths**: concurrent claiming, retry/backoff, dependency gating, and failure-to-dead-letter workflows.

Certifications

- 1st Position, Brand Revamp Hackathon** - Innovate X SRM 2024.
- NPTEL Human-Computer Interaction** – Scored 90/100 with Gold Medal (IIIT Delhi).
- Campus Mantri** – GeeksforGeeks Campus Ambassador for SRM (1 year).
- Generative AI & Prompt Engineering Internship** (6 weeks) – IGDTUW & Sansoftech.
- DSA with Java (Sigma)** - Apna College.
