Education

Srm Institute Of Science And Technology, B.Tech.CSE	CGPA: 9.57/10.0	2023-27
Adarsh Jain Dharmic Sikhsha Sadan	Percentage 87.2	2021-22
Bal Mandir Sr. Sec. School	Percentage 93.6	2019-20

Skills

Languages: Java, Python, JavaScript	Version Control: Git, GitHub
FrontEnd FrameWorks: HTML,CSS,React.js	BackEnd FrameWorks: Node.js,Express.js
Databases: Supabase: Postgres SQL	Deployment: GoDaddy , Vercel , Render
Key Concepts: Computer Networks, OOPS, Operating Systems, Data Structures and Algorithm	

Work Experience

1. Wealth Shala Full Stack Developer	Link
- Architected and developed a high-performance, responsive web application using React.js and TypeScript, leveraging Lucide-React for iconography and Framer Motion for smooth UI transitions, focusing on seamless user experience and financial literacy tools. - Successfully launched the platform to 100+ initial users, optimized GoDaddy server configurations.	
2. Xtin Capital Full Stack Developer	Link
- Architected and built the core foundation of the Xtin Capital platform from the ground up, scaling the application from concept to active users , developed and integrated high-performance APIs across all client-facing pages . - Led & mentored a team of 5 developers,assigning technical roles & managing sprint workflows to boost team productivity .	
3. Viral Fission Team Leader	Link
- Led and managed a team of 95+ ambassadors, overseeing their daily tasks and ensuring efficient workflow execution. - Elevated campaign performance by leveraging consumer insights and utilizing strong communication skills to drive team responsiveness.	

Projects

1. Airline Reservation System	Link
- Developed a comprehensive Full-Stack Airline Reservation System featuring dynamic flight search algorithms, an interactive 2D seat selection map, and automated PDF boarding pass generation - Optimized backend performance using PostgreSQL (via Supabase), implementing Row Level Security (RLS) policies and database triggers to manage secure user authentication and booking logic.	
2. Sutan Legal Corp.	Link
- Developed a scalable corporate legal platform using React.js, featuring dynamic attorney directories and logic-based intake forms, integrating automated appointment scheduling to streamline client onboarding and lead qualification. - Designed a relational database schema to efficiently manage complex relationships between practice areas, attorneys, and case histories while maintaining data integrity.	
3. IntelliRideX - Autonomous Vision Research Platform	Link
Implemented dataset comparison modules (KITTI, Waymo, nuScenes), model performance dashboards, and real-time parameter tuning using React, Tailwind CSS, and Chart.js. Focused on scalability, responsiveness, and intuitive UX to bridge the gap between theoretical research and practical understanding.	

Certification

NPTEL - Human Computer Interaction	Secured 90/100 score with Gold medal	Link
Workshop-cum-Internship – Generative Engineering & Prompt Design	IGDTUW & Sansoftech	Link
FutureSkills PRIME Project- C-DAC, NOIDA, NIELIT	Bootcamp on Big Data and Data Science	Link
Campus Mantri X Geek For Geeks	Campus Mantri for SRM - Completed 1 year	Link
International Conference for Viksit Bharat 2047 VBCB-2025	Lead Student Coordinator	Link
Indian Institute of Remote Sensing (IIRS), ISRO	AI / ML for Geodata Analysis	Link
Innovate X SRM 2k24	Won Brand Revamp	Link
